Bengaluru North City Corporation

Office of the Executive Engineer, Special Division, Amruthahalli Main Road, Byatarayanapura, Bengaluru560 092.

No. BNCC/EE/SD/TEND/PR/ /2026-27 Dated: 24-06-2026

Proceeding of Pre-Bid Meeting

Venue: Executive Engineer,
Office of Chief Engineer, Zone-1
BNCC, 2nd Floor, BNCC Building,
Amruthahalli Main Road, Byatarayanapura,
Bengaluru – 560092.

Date: 22-06-2026 @ 3.00 PM

Name of Work: Hiring, Operation and Maintenance of 10 Nos Latest Mechanical Road Sweeping Machines on Per Kilometer basis for 07 Years for Sweeping HDC, Arterial and Sub Arterial Roads with in Bengaluru North City Corporation.

Ref: 1. Tender Notification: BNCC/EE/SD/TEND/06/2026-27 Dt: 11-06-2026

****

Officers Present:

1. Sri. B G Raghavendra Prasad, Chief Engineer, Zone-1, BNCC
2. Sri. Prakash, Superintendent Engineer, Zone-1, BNCC
3. Sri. Srinivasulu G N, Assisitant Executive Engineer, Special Division, BNCC
4. Sri. Raghunandhan Mantri, Assistant Executive Engineer, Special Division, BNCC
5. Sri. Anjaneyalu B R, Assistant Engineer, Special Division, BNCC

Agencies Present:

1. M/s TPS Infrastructure Ltd
2. M/s Mounish Associates
3. M/s Aryan Pumps & Enviro Solutions Pvt Ltd

Executive Engineer
Special Division, BNCC

Compliance for the queries raised by bidders

The below queries received through KPPP Portal within specified time i.e., 22-06-2026 @ 15:00 hrs

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
1	1 1 Introduction	Page 9	The Bengaluru North City Corporation proposes to engage a private operator for the Hiring, Operation and Maintenance of Latest Mechanical Road Sweeping Machines along with associated tipper trucks for mechanized sweeping of roads within its jurisdiction, with the objective of reducing road dust, improving cleanliness, and ensuring effective collection and disposal of sweepings. Tenders are invited from eligible and experienced bidders located in India who have proven capability in operating maintaining, and managing Latest mechanical road sweeping machines and supporting logistics using their own equipment manpower, and resources.	Hence as explained in Sr.no.1 above, we request you to give the bidder free hand to choose, select and deploy the machines, as per their choice, keeping minimum requirement of 5.0 cu.mt. dirt hopper and minimum 2000 litres water tank as mentioned in the tender requirement or even higher capacity if one can supply at the Contractors cost for the betterment of the cleaning project Kindly consider and confirm	Tender Condition Prevails and Water Tank Capacity Minimum 800 liters and above
2	711 Minimum Eligibility Experience Criteria	Page 13	1 The bidder shall have a minimum of 3 years experience during the last five 5 financial years in operation of Latest mechanical road sweeping machines minimum effective dust collection capacity of not less than 5.00 m3 executed for Government Departments, Urban Local Bodies (ULBs), PSUs, or Statutory Authorities.2. The bidder shall have operated at least 5 Latest mechanical road sweeping machines under one or more contracts. (Refer Annexure A1	As per the eligibility criteria, we assume that if the Bidder has undertaken sweeping contract with any latest technology (self-propelled or truck mounted) for Diesel/ CNG / Electric fueled machines with any volumetric capacity, can be eligible to participate with consideration to the marking criteria as given in the tender Kindly clarify and confirm However the contractor shall provide the machines complying to tender requirement.	Tender Condition Prevails
3	SECTION I INVITATION FOR TENDER (IFT)	Page 7	Hiring Operation and Maintenance of 10 Nos Latest Mechanical Road Sweeping Machines on Per Kilometer basis for 07 Years for Sweeping HDC, Arterial and Sub Arterial Roads with in Bengaluru North City Corporation.	Your tender clearly specifies to provide Road Sweeping by using latest Mechanical Road Sweeping Machines 10 Nos including Operations and Maintenance including manpower, fuel, maintenance and all consumables. Therefore, we assume that the Contractor has to choose the best technology sweeper machines that is more suitable to the Bengaluru City ground reality. Hence, we further assume that the Bidder should provide their machine with technical specification considering the minimum criteria mentioned in the tender Kindly confirm.	Tender Condition Prevails
4	Technical Specification	Page 46	2 Make/Model Year 2025 or Latest	We find certain ambiguity in the technical specifications and kindly clarify the same. Kindly consider only brand-new machine as the machines are to be operated for a longer period	Tender Condition Prevails
5	Technical Specification	Page 46	3 Engine Capacity (CC) As per manufactures specifications for the purpose intended	We will provide the actual engine capacity along with technical brochure of integrated Truck mounted Sweeping machine as explained you below	Tender Condition Prevails
6	Technical Specification	Page 46	4 Fuel Type Diesel / CNG / Electric	We will provide Diesel fueled machines as mentioned in the tender	Tender Condition Prevails
7	Technical Specification	Page 46	5 Gross Vehicle Weight As per manufactures specifications for the purpose intended	We will provide all details as mentioned in the tender - As per manufactures specifications for the purpose intended.	Tender Condition Prevails
8	Technical Specification	Page 46	6 Engine Power as per manufactures specifications for the purpose intended	We will provide all details and technical literature at the time of tender for truck mounted integrated sweeping machine as per tender -As per manufactures specifications for the purpose intended.	Tender Condition Prevails
9	Technical Specification	Page 46	7 Payload Capacity as per manufactures specifications for the purpose intended	We will provide best payload capacity and higher volume so that the machines could run for entire length with uninterrupted operation and refilling avoiding valuable productive time, as mentioned in the tender - As per manufactures specifications for the purpose intended.	Tender Condition Prevails
10	Technical Specification	Page 46	8 Vehicle Emission Compliance BS-VI / applicable CEV norms	Will be provided as per your tender requirement.	Tender Condition Prevails
11	Technical Specification	Page 46	9 Minimum Engine Torque As per manufactures specifications for the purpose intended	We shall provide truck engine torque along with technical literature at the time of tender as mentioned by you- As per manufactures specifications for the purpose intended.	Tender Condition Prevails
12	Technical Specification	Page 46	10 Steering- Power Operated	Our truck mounted sweeper shall comply with tender requirements.	Tender Condition Prevails
13	Technical Specification	Page 46	11 Turning Radius As per manufactures specifications for the purpose intended	We will provide truck mounted sweeper details during tender -As per manufactures specifications for the purpose intended.	Tender Condition Prevails

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
14	Technical Specification	Page 46	12 Transaction speed of hydrostatic drive Minimum 40 kmph Hydrostatic or Crib drive to be allowed for better system control	We will provide better system that is most suitable for Road Sweeping activities continuous in nature. We understand that the Hydrostatic drive is only available in Compact Sweeper which are basically designed for Industrial use which require to move often the machine front and back which is not required for sweeping straight public roads. Therefore, Hydrostatic drive is not applicable and required for Truck mounted Sweeper and request to allow alternative for accommodating the truck mounted sweeper.	Tender Condition Prevails
15	Technical Specification	Page 46	16 No of Brooms/Brushes 3 and above	Our machines have total 5 brushes which clean more area and surface at one time.	Tender Condition Prevails
16	Technical Specification	Page 46	19 Dust Control System Filter based system capable up to PM2.5 / water recycling system / any better system	Our machines are designed as metal Filter based system with water sprinkling for effective dust control and the machines can be operated in dry as well as wet condition in all-weather condition	Tender Condition Prevails
17	Technical Specification	Page 46	21 Front Broom Length Minimum 1200 mm	The broom position is not in the front in the truck mounted sweeper but given underneath the chassis behind the suction port. Kindly amend.	Tender Condition Prevails
18	Technical Specification	Page 46	22 Front Broom Diameter Minimum 900 mm & above	This position is kept at the side for better management. Total 4 brushes are provided at both sides. Kindly amend.	Tender Condition Prevails
19	Technical Specification	Page 46	20 Water Tank Capacity Min. 2000 Liters to have longer duration cleaning, to have additional road washing system for better pollution control	This is an important factor and as we understand that your specification is aimed for a compact self-propelled sweeping machine, kindly make a note that in this type of machine 2000 litres water tank is not possible. Hence, we are sure the truck mounted sweeper can only meet your requirement, and we can provide more than 2500 litres water as it is required for dust suppression through sprinkling for continuous sweeping. We therefore request to allow truck mounted sweeper specification to fulfill your requirement	Water Tank Capacity Minimum 800 liters and above
20	Technical Specification	Page 47	28 Cleaning Method Vacuum based or conveyor or Combination of Vacuum and Conveyor type	we provide vacuum based methods as per tender requirement.	Tender Condition Prevails
21	Technical Specification	Page 47	29 Blower Suction Pressure Minimum 80 millibar	Our design allows auxiliary engines for generating vacuum	Tender Condition Prevails
22	Technical Specification	Page 47	33 Automatic Levelling System Hydraulic front suspension with automatic levelling system	we will provide the design as per chassis manufacturer specification.	Tender Condition Prevails
23	Tender Document	Additional	Additional	It is observed that the tender document does not specify the Mobilization Period or the Start Date for commencement of services.The scope of work requires deployment of specialized road sweeping machines and associated equipment. Such machines are highly customized, made-to-order vehicles and are generally manufactured only against confirmed purchase orders. These vehicles are not maintained as ready stock by OEMs due to their high capital cost and project-specific configurations.Considering the manufacturing lead time, body building, testing, registration, transportation, and deployment activities involved, a minimum period of 6 to 8 months is required from the date of issuance of the Purchase Order/Letter of Acceptance for successful mobilization.In view of the above, we request the Authority to kindly clarify the Mobilization Period/Start Date and allow a minimum mobilization period of 6-8 months from the date of Purchase Order/Letter of Acceptance for deployment of the required machinery and commencement of services.	Not Considered
24	Tender Document	Additional	Additional	Kindly clarify following provisions which are mandatory for estimationWater and Electricity require for operation and maintenanceParking space for Sweeper and tipper trucksOpen space for control office/ maintenance workshopDumping location and charges.Distance of dumping location from allocated roadsDistance of roads to be swept from Parking placeWe request to authority that above provisions shall be made free of cost to the contractor which will enable participation of technically qualified and experienced sanitation equipment operators, enhance competition, and assist the Authority in obtaining more competitive rates while ensuring effective project execution	Not Considered

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
25	Tender Document	Additional	Additional	The tender specifies an estimated rate of Rs. 699 per Km Path for a contract period of seven (7) years, extendable by a further three (3) years.In this regard, it is respectfully submitted that the estimated rate appears to be significantly lower considering the comprehensive scope of work envisaged under the tender, which includes, but is not limited toDeployment of specialized mechanical road sweeping machines.Deployment of tipper trucks and associated transportation arrangements.Fuel, lubricants, and consumables.Operation and maintenance of all equipment.Deployment of drivers, operators, cleaners, supervisors, and project management personnel.Insurance, registration, permits, statutory compliances, and taxes.Repair and replacement of wear-and-tear components, brushes, suction systems, hydraulic components, and other critical spares.Parking, logistics, and operational infrastructure.Financing costs associated with high-value capital equipment.Compliance with performance standards and contractual obligations throughout the contract period.Further, the contract requires bidders to quote fixed rates for multiple years with no provision for escalation, indexation, or adjustment on account of inflation, increase in fuel prices, labour costs, spare parts costs, or other operating expenses.Considering the substantial capital investment and recurring operational expenditure involved, the estimated rate of Rs. 699 per Km Path may not adequately reflect prevailing market costs and could adversely impact long-term sustainability and quality of service delivery.Accordingly, we request the Authority to kindly review the cost estimates and revise the estimated rate based on current market conditions, actual operating costs, and the long-term financial commitments required under the contract. This will encourage participation by qualified bidders, enhance competition, and ensure sustainable and efficient execution of the project throughout the contract period.	Tender Condition Prevails
26	Tender Document	Additional	Additional	The project requires substantial upfront investment towards procurement/manufacturing of specialized mechanical road sweeping machines, deployment of tipper trucks, establishment of operational infrastructure, recruitment and training of manpower, insurance, statutory compliances, and other pre-operational activities prior to commencement of services.It is submitted that the road sweeping machines envisaged under the tender are highly specialized, customized, and made-to-order vehicles. Such equipment is generally manufactured only against confirmed orders and involves significant capital expenditure with long manufacturing and delivery lead times. The successful bidder is required to make substantial investments well before commencement of revenue generation under the contract.Considering the long contract duration and the significant capital commitment required for successful execution of the project, we request the Authority to kindly provide a Mobilization Advance equivalent to 20 of the Contract Value against submission of an appropriate Bank Guarantee or other acceptable security.Provision of mobilization advance will enable the successful bidder toExpedite manufacturing and deployment of the required machinery.Ensure timely mobilization of resources and commencement of services.Reduce financing costs associated with large capital investments.Facilitate participation of technically competent bidders.Promote healthy competition and result in more competitive bid prices for the Authority.Accordingly, we request the Authority to kindly consider providing a Mobilization Advance of 20 of the Contract Value, recoverable from subsequent running bills in a mutually agreed manner, against suitable security to safeguard the interests of the Authority.	Tender Condition Prevails

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
27	Tender Document	Page No. 09	1 1 IntroductionThis tender is strictly a service contract. It does not involve procurement or purchase of sweeping machines or tipper trucks by the Corporation. Ownership of all equipment shall remain with the successful bidder throughout the contract period.	It is highlighted that Road Sweeping Machines and Tipper Trucks are distinct categories of equipment and may be procured from different manufacturers/OEMs. While Road Sweeping Machines are specialized equipment directly related to the service scope, Tipper Trucks are standard transportation vehicles that are commonly hired or leased for operational requirements.Accordingly, we request the Authority to kindly amend the clause as followsOwnership of Road Sweeper Machines shall remain with the successful bidder throughout the contract period.The bidder may lease/hire Tipper Trucks from other agencies for execution of the work. A valid lease/hire agreement shall be submitted along with the tender documents and maintained throughout the contract period.This amendment will promote wider participation, provide operational flexibility, and ensure efficient execution of the services without affecting the quality or performance obligations under the contract.	Tender Condition Prevails
28	Tender Document	Page no. 10	1 2 7 Sweeping machines should operate only for 8 hours from 10 pm to 6 am, in a manner that ensures minimum disturbance to traffic and public movement	It is requested to kindly clarify whether the travel time involved in mobilizing the machines from the designated parking/holding area to the assigned roads, inter-route movement between work locations, and return travel to the parking/holding area after completion of work shall be considered as part of the prescribed 8-hour operating period.OR The requirement is for 8 hours of actual sweeping operations, excluding travel and positioning time, in which case the travel duration would be over and above the stipulated working hours.This clarification is essential as the interpretation of working hours directly impacts machine productivity, route planning, manpower deployment, fuel consumption, operational costs, and consequently the rates to be quoted by the bidders.	Tender Condition Prevails
29	Tender Document	Page No. 10	1 2 12 The Contractor shall deploy, at a minimum, 1 driver, 1 cleaner, and 1 footpath cleaner for each sweeping machine and each tipper truck, and for the operation of sweeping machines shall additionally deploy 1 full-time Project Manager and 1 full-time Supervisor for overall coordination and day-to-day supervision.	Kindly clarify whether the requirement of deploying 1 Driver, 1 Cleaner, and 1 Footpath Cleaner is applicable separately for each tipper truck in addition to each road sweeping machine.It is submitted that the primary function of the tipper truck is transportation and disposal of collected silt, dust, and debris. For operation and maintenance of tipper trucks, deployment of a Driver and, if required, a Helper/Cleaner is generally sufficient. The requirement of an additional Footpath Cleaner for each tipper truck does not appear to be operationally necessary and may result in significant additional manpower costs without corresponding operational benefits.Accordingly, we request the Authority to kindly clarify the minimum manpower requirement for tipper trucks and consider revising the provision, if applicable, to align with the actual operational needs of the tipper truck fleet.This clarification is essential for accurate assessment of manpower costs and preparation of competitive bids on a uniform basis.	Tender Condition Prevails
30	Tender Document	Page No. 11	3 3 Bidders shall quote year-wise per-kilometer Path rate (inclusive of all applicable Taxes) for each of the seven (7) contract years in Annexure-C. The per-kilometer rate (inclusive of all applicable Taxes) quoted for each contract year shall be firm and fixed for that respective year. No escalation, price adjustment, indexation or revision shall be admissible on any account.	Kindly clarify the applicability of GST on the subject contract and requested to confirmWhether GST is applicable to the services covered under this contract.If GST is applicable, whether bidders are required to include GST in the quoted per-kilometer rates or it shall be payable extra at actuals.In the event of any change in GST rates, introduction of new taxes, or modification in statutory tax provisions during the contract period, whether such statutory variations shall be reimbursed separately at actuals by the Corporation or shall be deemed included in the quoted rates.This clarification is essential since the contract period is seven years and any future statutory changes in tax rates are beyond the control of the contractor and may have significant financial implications on contract execution.	The agency shall quote the rate considering all applicable taxes on this contract. (Total Quoted rate = Basic Rate + Taxes applicable on this contract)

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
31	Tender Document	Page No. 11	3 3 Bidders shall quote year-wise per-kilometer Path rate (inclusive of all applicable Taxes) for each of the seven (7) contract years in Annexure-C. The per-kilometer rate (inclusive of all applicable Taxes) quoted for each contract year shall be firm and fixed for that respective year. No escalation, price adjustment, indexation or revision shall be admissible on any account.	The tender provides for a contract period extending beyond the initial seven years, subject to extension by the Authority. In this regard, the tender document does not specify the applicable payment rates during the extended period beyond the seventh year.Accordingly, we request the Authority to kindly clarify the applicable per-kilometer rates for the extended contract period from the eighth (8th) year to the tenth (10th) year, if the extension option is exercised.This clarification is essential for proper assessment of long-term commercial obligations and financial commitments under the contract, particularly considering the substantial capital investment required for procurement and deployment of specialized road sweeping equipment.	The contract shall be for a total period of 7 years, subject to annual performance review and inspection by the Corporation. Continuation of the contract beyond 7 years for another year shall be conditional upon satisfactory performance, as assessed against prescribed KPIs. Total Contract period shall not exceed 10 years. **However the applicable per-kilometer rates for the extended contract period from the eighth (8th) year to the tenth (10th) year shall be 5.00 % escalation on perivous year's quoted rate.**
32	Tender Document	Page No. 13	a Experience Criteria1. The bidder shall have a minimum of 3 years experience during the last five 5 financial years in operation of mechanized road sweeping executed for Government Departments, Urban Local Bodies (ULBs), PSUs, or Statutory Authorities.	We respectfully submit that we are one of Indias leading manufacturers of specialized vehicle-mounted sanitation and waste management equipment and the first Indian company to export such high-technology Make in India vehicles to Europe, America, and Australia, thereby demonstrating international acceptance and quality standards of our products.Over the past two decades, we have manufactured and deployed more than 500 vehicle-mounted machines used for solid and liquid waste management applications, equipped with debris/water tanks, high-pressure washing systems, high-capacity vacuum systems, and other specialized sanitation technologies. We have also provided comprehensive operation and maintenance services for such equipment to various Government and municipal organizations.Further, we have supplied similar high-capacity sanitation machines to Bengaluru Municipal authorities, where the equipment is operating satisfactorily and contributing to municipal sanitation services.It is submitted that the technology, operational methodology, maintenance requirements, manpower deployment, and service delivery aspects of such vehicle-mounted sanitation equipment are substantially similar to those involved in mechanized road sweeping operations.Accordingly, we request the Authority to kindly consider and accept experience relating to operation and maintenance of chassis mounted machines equipped with vacuum system, high pressure washing/ jetting system used for solid or liquid waste handling applications, as eligible experience for meeting the qualification criteria.This would broaden competition, encourage participation by technically competent and experienced sanitation equipment operators, and enable the Authority to receive more competitive bids while maintaining the desired technical and operational standards.	Tender Condition Prevails

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
33	Tender Document	Page No. 13	a Experience Criteria2. The bidder shall have operated at least 5 Latest mechanical road sweepingmachines under one or more contracts. (Refer Annexure A-1)	We respectfully submit that several specialized vehicle-mounted sanitation and waste management machines utilize technology and operational systems comparable to those employed in mechanical road sweeping equipment. Such machines are equipped with debris collection systems, high-capacity vacuum systems, water tanks, high-pressure washing arrangements, hydraulic systems, and other specialized components requiring similar operational expertise, maintenance capabilities, and manpower deployment.We have extensive experience in operation and maintenance of vehicle-mounted machines used for solid and liquid waste management applications and equipped debris/water tank, High-pressure washing systems, High-capacity vacuum systems.The operation and maintenance of such equipment involve technical competencies substantially similar to those required for mechanized road sweeping machines.Accordingly, we request the Authority to kindly clarify and amend the eligibility criteria to consider experience in operation and maintenance of chassis mounted machines equipped with vacuum system, high pressure washing/ jetting system used for solid or liquid waste handling applications as eligible experience for compliance with this requirement.This amendment will enable participation of technically qualified and experienced sanitation equipment operators, enhance competition, and assist the Authority in obtaining more competitive rates while ensuring effective project execution.	Tender Condition Prevails
34	Tender Document	Page No. 13	b 1.The bidder shall have achieved a minimum average annual turnover of 17.91 Crores in any 2 of the last 3 financial years, from operations relatedto mechanized sweeping, solid waste management, or similar urban services.	The bidder shall have achieved a minimum average annual turnover of 17.91 Crores in any 2 of the last 3 financial years, from operations related to mechanised sweeping services or similar urban services or sanitation services such as solid or liquid waste handling.	Tender Condition Prevails
35	Tender Document	Page No. 14, 23.8	TECHNICAL EVALUATION, Point 1Relevant Experience in Mechanized Road Sweeping Refer annexure B1	Experience of the bidder in operation and maintenance of Using Latest mechanical road sweeping machines or similar mechanized sweeping equipment OR chassis mounted machines equipped with sludge/dust tank, vacuum system, high pressure washing/ jetting system used for solid or liquid waste handling applications for Government / ULB / PSU projects during the last 10 years.	Tender Condition Prevails
36	Tender Document	Page No. 25	24 ABNORMALLY LOW OR UNBALANCED BIDSIf the bid of the successful bidder is found to be abnormally low or unbalanced in comparison to the Authoritys estimate, the Authority may require the bidder to submit a detailed cost justification to demonstrate the internal consistency and viability of the quoted bid.If the justification is found unsatisfactory, the Authority reserves the right to reject the bid or seek enhanced performance security, in order to safeguard against the risk of non-performance.The Authority reserves the right to accept or reject any tender, or annul the tendering process, in accordance with the provisions of the tender documents, without incurring any liability to the bidders	Kindly clarify the rate of Additional Performance Security and applicability.	Tender Condition Prevails
37	Tender Document	Page No. 27	32 The successful bidder shall furnish Performance Security equivalent to five percent (5) of the annual Contract Value for the respective contract year, in the form of an irrevocable Bank Guarantee issued by a Nationalised or Scheduled Bank. The Performance Security for the first contract year shall be submitted at the time of signing of the Contract and shall be valid for a period of sixty (60) days beyond the expiry of the first contract year. For each subsequent contract year, the Performance Security shall be revised based on the Contract Value for that respective year and shall be submitted at least thirty (30) days prior to the expiry of the Performance Security of the preceding year. This process shall be followed for all subsequent years of the contract, subject to continuation of the contract based on satisfactory performance	31 The successful bidder shall furnish Performance Security equivalent to two percent (2) of the annual Contract Value for the respective contract year, in the form of an irrevocable Bank Guarantee issued by a Nationalised or Scheduled Bank. The Performance Security for the first contract year shall be submitted at the time of signing of the Contract and shall be valid for a period of sixty (60) days beyond the expiry of the first contract year. For each subsequent contract year, the Performance Security shall be revised based on the Contract Value for that respective year and shall be submitted at least thirty (30) days prior to the expiry of the Performance Security of the preceding year. This process shall be followed for all subsequent years of the contract, subject to continuation of the contract based on satisfactory performance	Tender Condition Prevails

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
38	Tender Document	Page No. 33	17 TERMINATION FOR DEFAULT 171 The Authority may, without prejudice to any other remedy for breach of contract, bywritten notice of default sent to the contractor, terminate the Contract in whole or parta) if the contractor fails to perform any of the services within the period(s) specified inthe Contract, or within any extension thereof granted by the Authority orb) if the contractor fails to perform any other obligation(s) under the Contract.c) If the contractor, in the judgment of the Authority has engaged in corrupt orfraudulent practices in competing for or in executing the Contract.	In addition to the existing provisions of the tender, it is requested that the following clause be incorporatedIn the event of termination of the contract by the Authority, the Authority shall pay the Contractor all undisputed dues up to the date of termination. Further, where specialized machinery and manpower have been deployed exclusively for execution of the contract, the Authority shall compensate the Contractor by way of payment equivalent to 100 of the book value of such deployed machinery as on the date of termination, together with employee wages and statutory obligations for a period of three (3) months from the date of termination.	Tender Condition Prevails
39	Tender Document	Page no. 40	Key Performance Indicators (KPIs) Linked to Payment	We request to consider the Key Performance Indicators (KPIs) Linked to Payment similar to Tender invited by Bangalore West City Corporation which is more appropriate and achievable.The min. targeted work of 40 Km per day is practically not achievable considering effective sweeping of roads.	Tender Condition Prevails
40	Tender Document	Page no. 45	33 Automatic Levelling System - Hydraulic front suspension with automatic leveling system.	Automatic Levelling System - Hydraulic front suspension with automatic leveling system or as per OEM design.Restricting the requirement to a particular suspension configuration may unnecessarily limit participation of otherwise technically compliant OEMs. Therefore, it is requested to permit equivalent suspension and leveling arrangements as per the vehicle manufacturers standard OEM design.	Tender Condition Prevails
41	Tender Document	Page No. 9	1 2 3 Each Latest sweeper machine shall be operated to achieve a minimum sweeping distance of 40 km per machine per day, sweeping both sides of the road, for approximately 320 working days per year, covering an estimated 858 km of roads sweeping length within the limits of Bengaluru North City Corporation.	As per the tender requirement, each sweeper machine is required to achieve a minimum sweeping distance of 40 km per day. Considering the deployment of 10 road sweeping machines, the cumulative sweeping distance works out to 400 km per day (10 x 40 km).In view of the above, the stated road sweeping length of 858 km appears inconsistent with the required daily sweeping output.Therefore, we request the Authority to kindly clarify on the same.	Tender Condition Prevails
42	Tender Document	Page No. 9	1 2 3 Each Latest sweeper machine shall be operated to achieve a minimum sweeping distance of 40 km per machine per day, sweeping both sides of the road, for approximately 320 working days per year, covering an estimated 858 km of roads sweeping length within the limits of Bengaluru North City Corporation.	The tender stipulates that each mechanical road sweeping machine shall achieve a minimum sweeping distance of 40 km per day and that approximately 858 km of road length is proposed to be covered within the Corporation limits.However, while the tender specifies the daily performance target, it does not clearly indicate the minimum assured quantity of work to be allocated to the contractor during the contract period.Since deployment of specialized road sweeping machines involves substantial capital investment, manpower deployment, maintenance costs, financing commitments, and fixed operating expenses, the absence of a minimum assured work quantity creates uncertainty in assessing the commercial viability of the project and preparing an accurate bid.Accordingly, we request the Authority to kindly clarifyThe minimum assured road length/work quantity that will be allocated to the contractor during the contract period.The payment mechanism applicable in the event that the Corporation is unable to provide sufficient road length to achieve the prescribed daily target of 40 km per machine per day.This clarification will enable bidders to accurately assess project risks, optimize resource deployment, and submit competitive and realistic bids on a uniform	Tender Condition Prevails
43	Tender Document Page No 13	SECTION VII - QUALIFICATION CRITERIA, Sl No. (a)	Experience Criteria	We request you to kindly permit the participation of Authorized Dealers / Channel Partners in the subject tender based on the credentials, experience, and qualification documents of the respective OEM.The Authorized Dealer shall submit a valid and current Authorization Certificate issued by the OEM, along with all necessary supporting documents demonstrating the OEM technical capability, past experience, and compliance with the tender qualification requirements	Tender Condition Prevails
44	Tender Document Page No 46	SECTION VI TECHNICAL SPECIFICATIONS, Sl No 20	Water Tank Capacity -Minimum 2000 Liters To have longer duration cleaning, to have additional road washing system for better pollution control	Please appreciate that the machine is fitted with filter system and does not require such a huge water tank. The requirement may be amended as under- Water Tank Capacity Minimum 400 Liters and above	Water Tank Capacity Minimum 800 liters and above

S.No	Document Name	Page Number/ Section Name	Statement	Query	Compliance
45	Tender Document Page No 47	SECTION VI TECHNICAL SPECIFICATIONS, SI No 33	Automatic Leveling System - Hydraulic front suspension with automatic leveling.	Suspension System -Suitable suspension system to be provided on front and rear axle	Tender Condition Prevails
46	Tender Document Page No 47	SECTION VI TECHNICAL SPECIFICATIONS, SI No 36	Camera - 360 degree view camera system shall be provided	The proposed front, rear, and brush cameras will adequately ensure operational safety, visibility, and monitoring requirements.	Tender Condition Prevails
47	Tender Document Page No 47	SECTION VI TECHNICAL SPECIFICATIONS, SI No 38	High Pressure Water Pump- The machine shall be equipped with high pressure washing system capable of delivering various water flow and pressure outputs ranging from 10 LPM- 100 bar pressure to 100 LPM at 100 Bar pressure and vice versa. This will have operational flexibilities to use more water or high-pressure jets as per the onsite cleaning requirement for most effective results. Additionally Full width washing bar with sufficient no of nozzles is to be provided for effective dust suppression and road washing with high pressure water pump. Water spray jets are to be provided at broom for effective cleaning and dust suppression	The specifications are adopted from a particular manufacturer. Please amend as under. High Pressure Water Jet, Vacuum Booster Module or suitable system as per manufacturer specification.	Tender Condition Prevails
48	Tender Document, Page No. 65, ANNEXURE A1 AND B-1	RELEVANT EXPERIENCE IN MECHANISED ROAD SWEEPING	The bidder shall have a minimum of three years experience during the last five 5 financial years in operation of mechanised road sweeping and mechanised sanitation, executed for Government Departments, Urban Local Bodies, PSUs, or Statutory Authorities.(Refer Annexure A-1). The bidder shall have operated at least five 5 latest mechanical road sweeping machines (or similar mechanised sweeping equipment) under one or more contracts, as detailed above.(Refer Annexure A-1).The bidder shall have operated at operation and maintenance of Using minimum 10 number of Latest mechanical road sweeping machines or similar mechanised sweeping equipment executed for Government, ULB, PSU, Statutory Authorities (Refer Annexure B-1)	We respectfully submit that the requirement of minimum 3 years experience may kindly be reconsidered. In practical scenarios, an operational experience of minimum 1 year or 312 working days is sufficient to demonstrate the bidders technical capability, operational efficiency, and service performance for such equipment. Further, we request that the minimum dust collection capacity criteria of 5 cum for self-propelled machines may be relaxed to 3 cum, as- 3 cum capacity machines are also widely used across ULBs and municipal applications. These machines are technically capable of delivering efficient sweeping performance. This relaxation will encourage broader participation and promote competitive bidding without compromising operational requirements. Accordingly, the subject clause may be amended as under-Experience Criteria-The bidder shall have a minimum of 1 year or 312 days experience during the last five 5 financial years in operation of Self-propelled mechanical road sweeping machines (minimum effective dust collection capacity of not less than minimum 3 cum, executed for Government Departments, Urban Local Bodies, PSUs, or Statutory Authorities. The bidder shall have operated at least 5 self-propelled mechanical road sweeping machines under one or more contracts.(Refer Annexure A-1)	Tender Condition Prevails

Hence Pre-bid Meeting is concluded.

Executive Engineer
Special Division, BNCC
